

CONNECT YOUR ASSETS TO WORKFLOWS

for faster, error-free work in the field

HOW IT WORKS

1. Create an Asset Collection – Upload your assets in Excel/CSV to Fluix, or create assets manually. Organize Assets into collections: “equipment,” “vehicles”, “locations”.

ASSET COLLECTION

ASSET NAME	ASSET ID

2. Connect assets to dynamic forms – Configure prefill of dropdowns and related fields from the asset collection.

FORM BUILDER

3. Add forms to workflows – Add the configured form to the workflow task for the field team.

WORKFLOW

4. Complete Mobile Forms – Field teams select the assets from the list and the related fields are auto-populated.

5. Track activity – Monitor asset usage by filtering tasks and processes by specific assets.

ACTIVITY STATUS

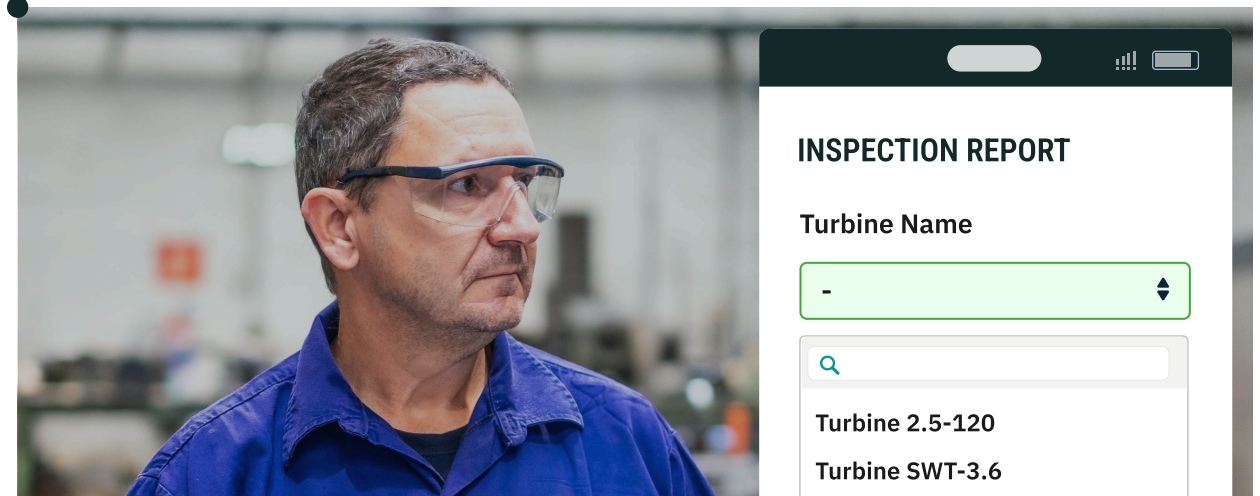

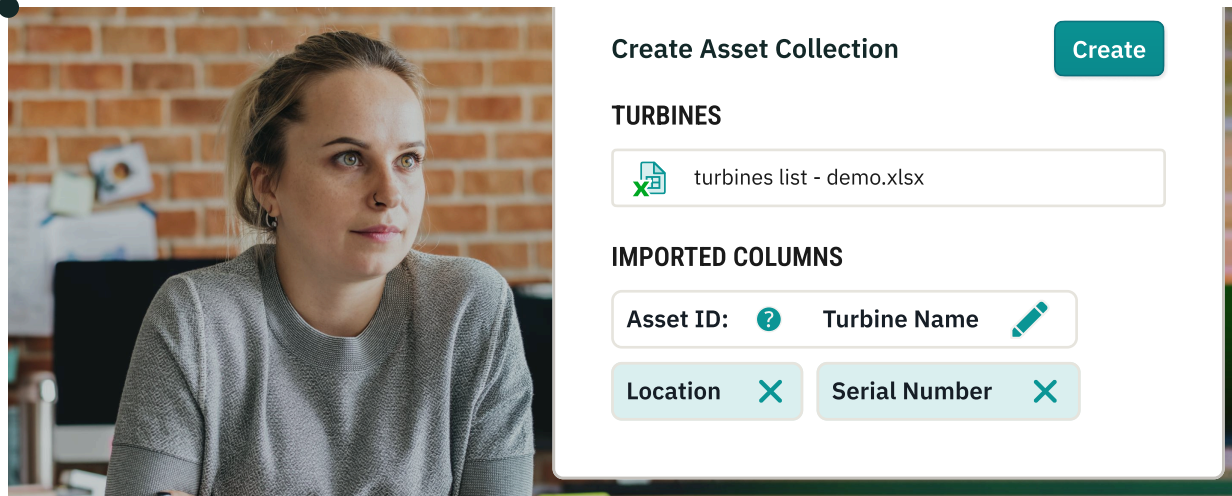

KEY BENEFITS

Key Benefits For Admin

- **Accurate Data** - Ensure the forms are completed fast and with the latest company data.
- **Structured Assets** - Keep all asset details and workflow activity on them in one place.
- **Gained Visibility** - Have a centralized asset tracking in real time, with an export option.

Key Benefits For Field Team

- **Saved Time on Typing** - Select from prefilled dropdowns instead of entering data manually when completing forms.
- **Up-to-date Lists** - Access the latest asset lists instantly, without waiting for updated spreadsheets or paper forms.
- **Minimized Errors** - Reduce typos, duplicates, and inconsistent entries with automated prepopulation of fields.

AVAILABILITY

Fluix Assets is available on the Pro Plan.
