WHAT IS ISSUE REPORT?

Issue Report helps teams automatically turn completed inspection checklists into clear, professional summary reports.

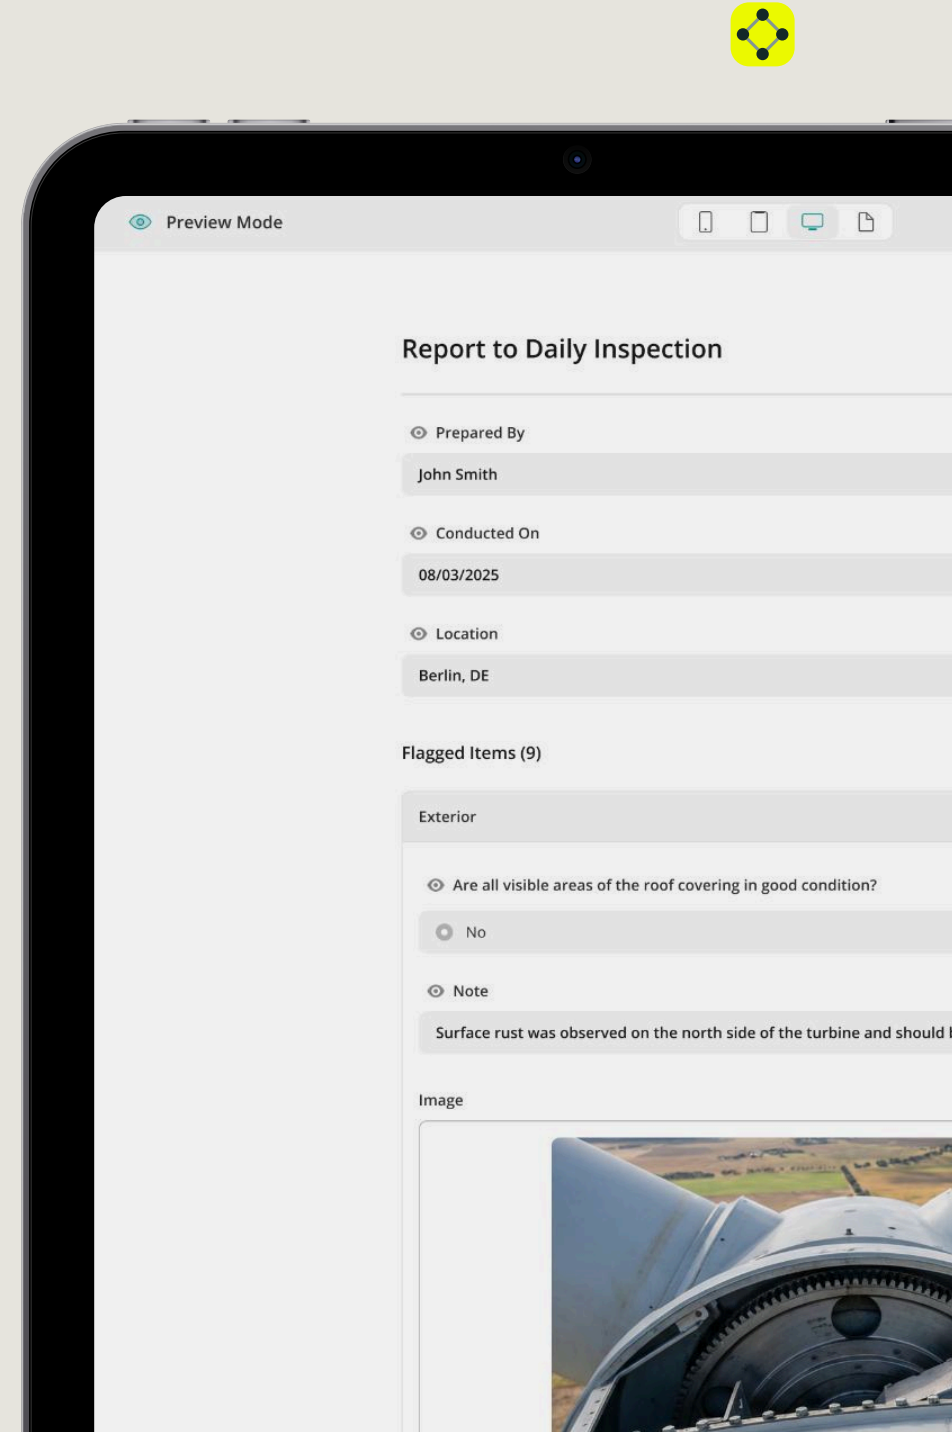

THE CHALLENGE

After an inspection, teams often need to:

- Create multiple reports for different audiences
- Manually copy data from checklists into summaries
- Share results with customers, supervisors, & internal teams
- Track issues and follow up on resolutions.

THE SOLUTION

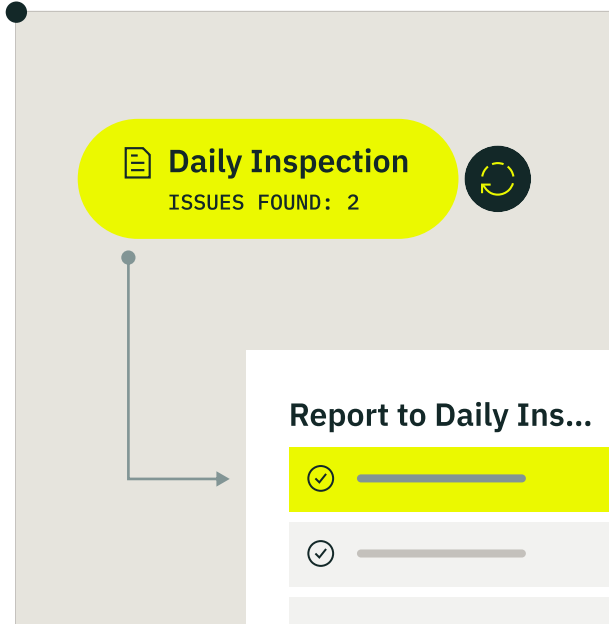

Issue Report automatically converts completed checklists into ready-to-share summary reports.

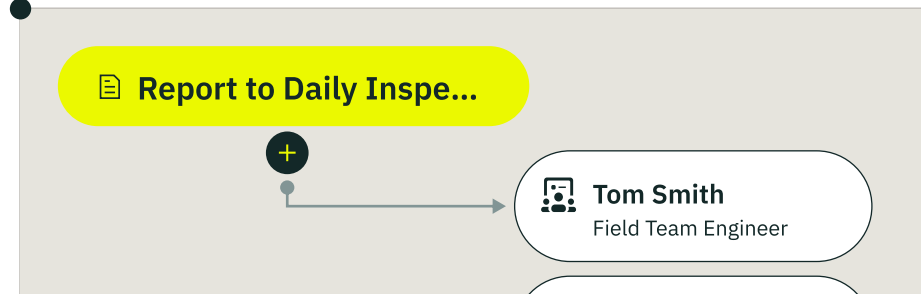

WHAT YOU CAN DO WITH ISSUE REPORT

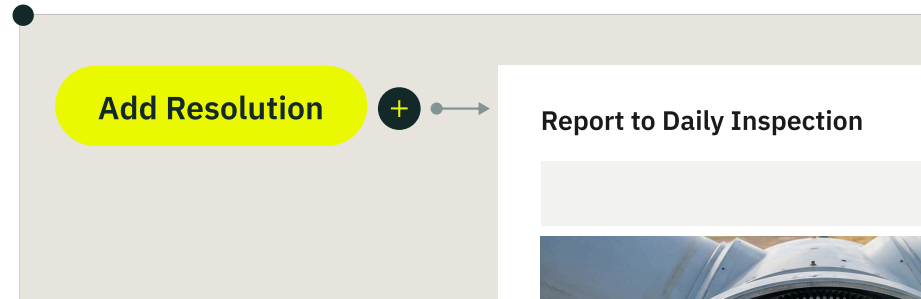

Generate inspection summaries instantly. Automatically generate reports from completed checklists, eliminating the need for manual copy-pasting and double data entry.

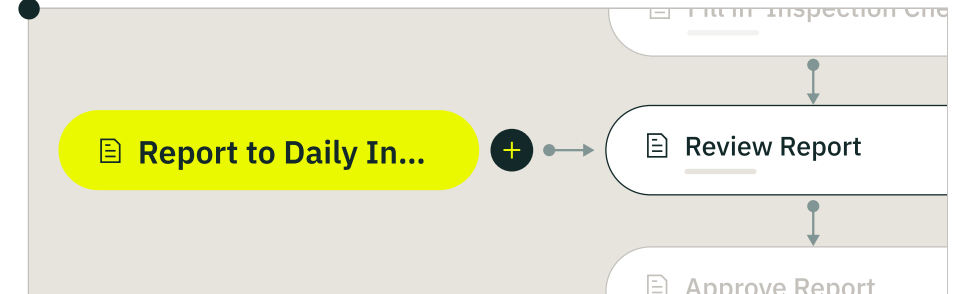

Share results with the right people. Email reports to customers in a view-only format or route them to the next workflow participant in seconds in editable format.

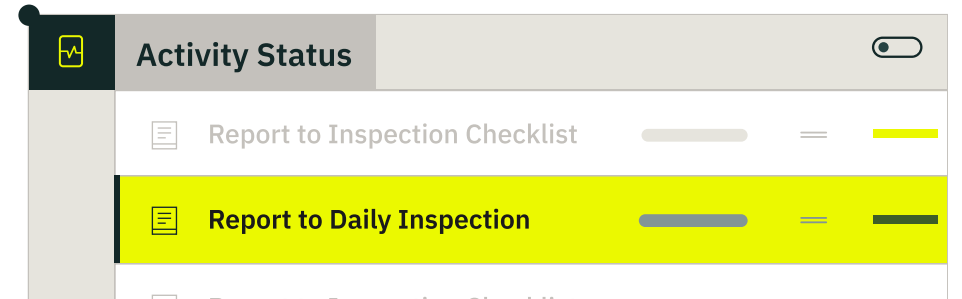

Add resolutions to identified issues. Document corrective actions directly in the report.

Collaborate with other teams on reports. Make reports part of your workflow and route them for review, approval, or completion without leaving Fluix.

Quick Reporting from the field. Filter Activity Status to view only processes with Issue Reports.

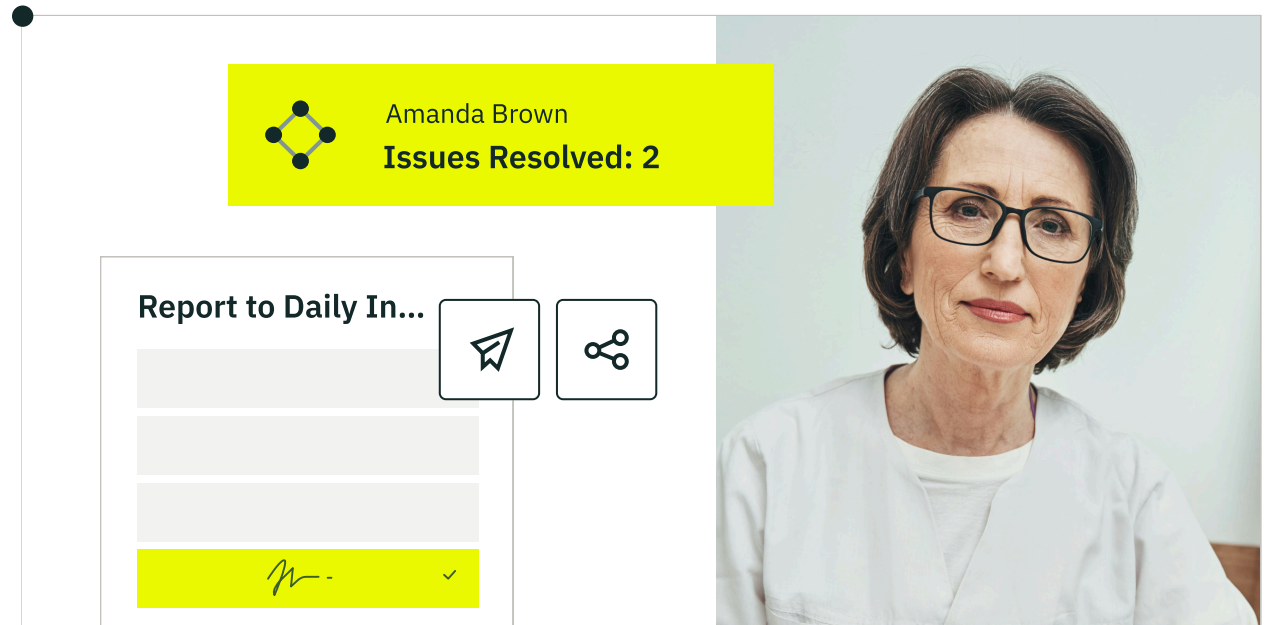

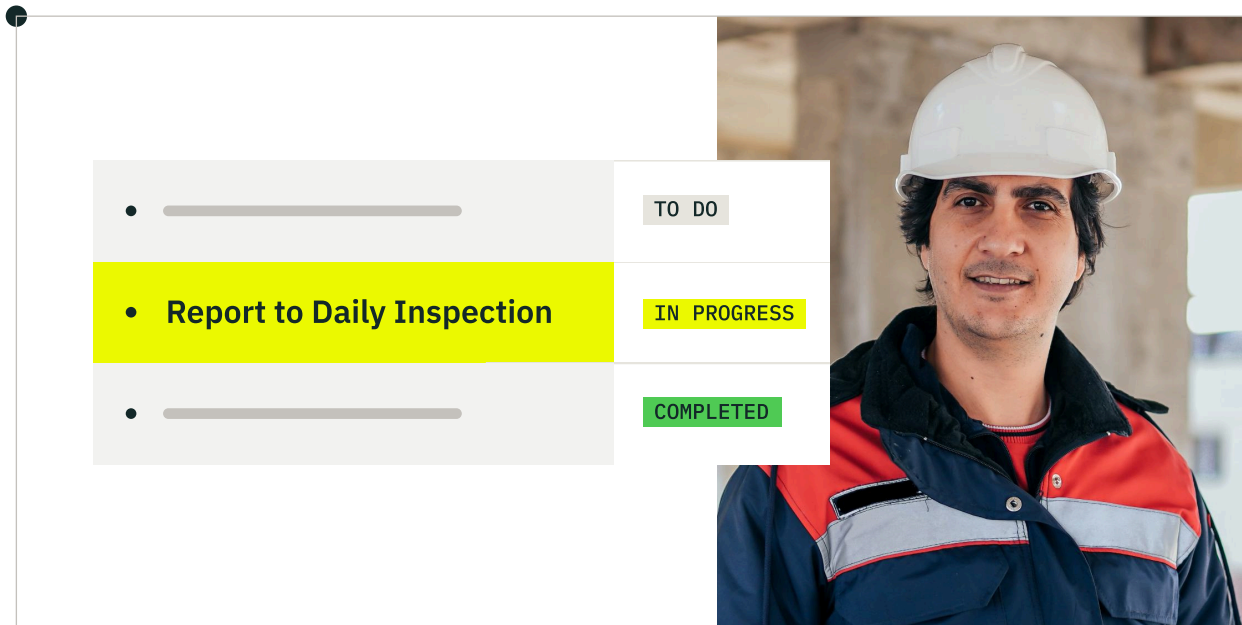

WHO IT'S FOR

- **Field teams & inspectors** to reduce admin work after inspections.
- **Service & maintenance teams** to fix issues faster with clear handoffs.
- **Operations** to stay informed and track inspection progress.
- **Safety & quality teams** to keep consistent, audit-ready records.
- **Customer-facing teams** to provide transparent proof of work with customers instantly

KEY BENEFITS

- **Assign clear accountability.** Assign responsibility so issues are resolved instantly.
- **Prioritize what matters.** Surface critical findings first and act before small issues escalate.
- **Visibility for stakeholders.** Keep customers and stakeholders informed with shareable, ready-to-send reports.
